DETAILED ACTION

1. Acknowledgment is made in the receipt the amendment filed July 28, 2005 and the supplemental amendment filed October 6, 2005.

Allowable Subject Matter

2. Claims 1-6 and 8-17 are allowed.

3. The following is an examiner's statement of reasons for allowance: with regards to claims 1, 8 and 14 the prior art of record fails to anticipate or render obvious a rotary steering damper having an actuator secured to a lower surface of the housing extension, the lower surface extending in a direction normal to an axis of the damper shaft; with regards to claims 5 and 12, the prior art of record fails to anticipate or render obvious a rotary steering damper comprising a linkage member comprising dual pivot connections, and a bifurcated steering torque transfer arm connecting the linkage member and the damper shaft of the steering damper; with regards to claim 15, the prior art of record fails to anticipate or render obvious a steering damper comprising a linkage connecting the damper shaft to the steering system side, wherein the linkage includes a steering torque transfer arm and a link member, and wherein a first end of the steering torque transfer arm is fixed to the damper shaft, a second end of the steering torque transfer arm is rotatably attached to a first end of the link member, and a second end of the link member is rotatably attached to the top bridge; with regards to claim 6, upon further consideration it is agreed that the prior art of record fails to anticipate or render obvious a rotary steering damper comprising a mechanical pressure control valve in parallel with an electric pressure control valve, wherein a maximum opening pressure of the electric pressure control
